

Teijin Aramid wins Best Practices Award Frost & Sullivan

Teijin Aramid has received the 2016 Global Enabling Technology Leadership Award from leading independent market research firm Frost & Sullivan. This award recognizes the unmatched performance of conveyor belts reinforced with Twaron, which enables the industry to realize a lower cost of ownership, longer lifetime and reduced energy consumption.

Optimized conveyor belts with aramid

"Teijin Aramid has successfully set an industry standard, backed by its ability to address the unmet user needs for a solution promising lower cost of ownership, longer lifetime and less energy consumption in conveyor belts. With its strong overall performance, Teijin Aramid has earned Frost & Sullivan's 2016 Enabling Technology Leadership Award." – Mariano Kimbara, Frost & Sullivan Industry Analyst

Key benefits of using Twaron® aramid in conveyor belts:

- > Superior strength and durability
- > Lower energy consumption and environmental impact
- > Lower operating costs
- > Resistance to corrosion, heat and flame
