

Twaron® for ballistic vests

Many of today's protective vests are made from Twaron, which provides enhanced protection, more comfort, and advantageous performance/weight ratios. At Teijin Aramid we have over two decades' experience of developing advanced Twaron-based ballistic solutions, enabling the production of lighter, stronger, and more comfortable protective vests - essential equipment that will meet the needs of today's users as well as those of tomorrow.

Vests with Twaron®

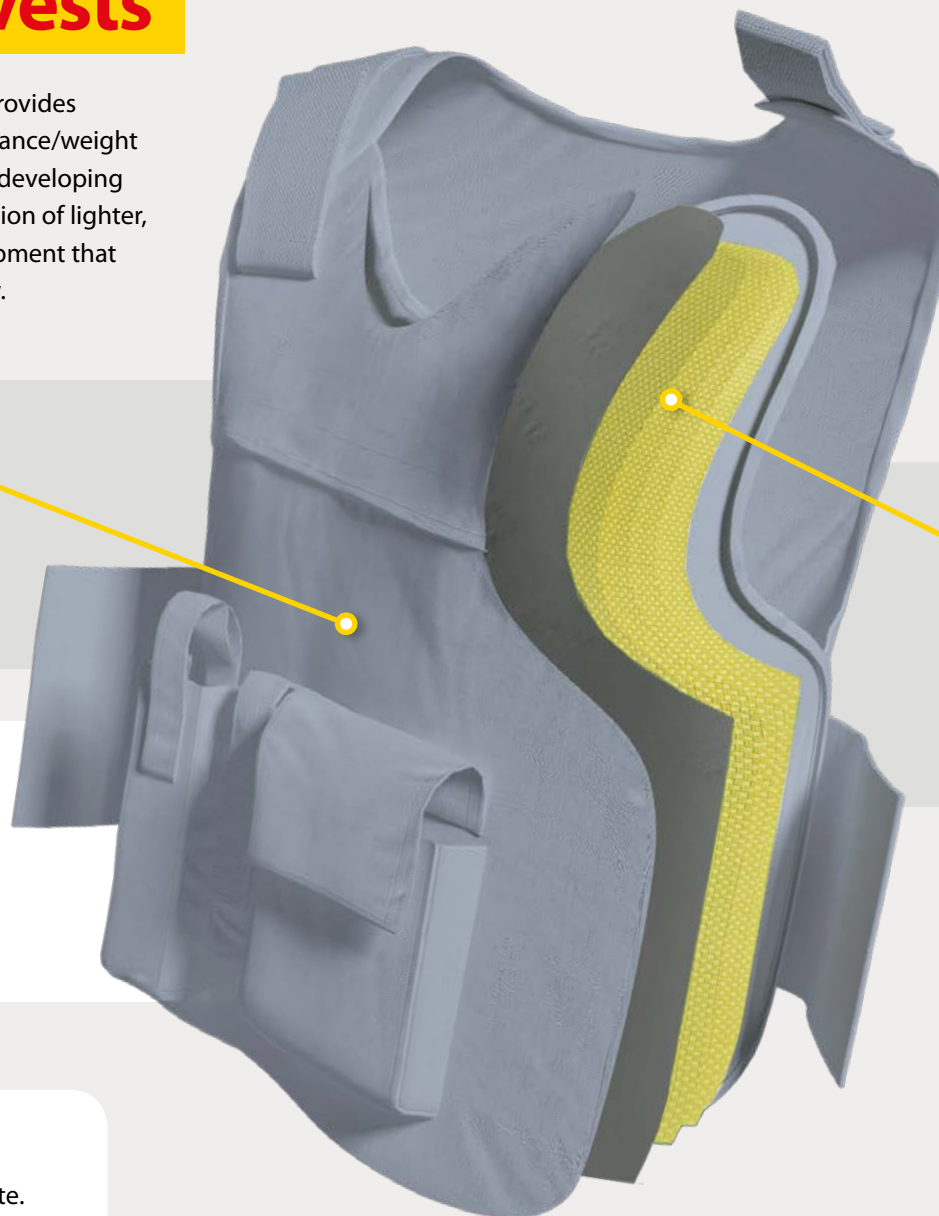

- have high ballistic protection
- protect against bullets, fragments & stabbing
- have lower weight, greater comfort and longer lifetimes
- have good price and performance ratio

Teijin Aramid offers

- dedicated R&D facilities
- high level of technical support
- custom-built solutions, together with our customers
